EDUCATION IN NEBRASKA BY THE NUMBERS
Dear Reader,

Education in Nebraska by the Numbers, produced by UNO’s Center for Public Affairs Research (CPAR), provides a graphic analysis of public education finance and governance in Nebraska. The report includes detailed information on public education revenue and spending at the pre-Kindergarten through 12th grade (PK-12) and postsecondary levels, along with figures regarding Nebraska’s PK-12 and postsecondary education governance structures. This research is intended to provide readers with information needed to evaluate two fundamental questions regarding Nebraska’s educational investment: Are we structured and financed in a manner conducive to achieving our educational goals?

The data used in this report is collected from various sources. For instance, for PK-12 finance data, CPAR downloaded 2017-18 annual financial reports by school district and did their own calculations for the composition of Nebraska’s school funding and per-student expenditures. They used yet another data source, the United State Census’ 2016 Annual Survey of School System Finances, for comparisons of PK-12 spending nationally. For higher education, they gathered individual and system-wide budgets, along with annual review documents, to provide accurate and timely data. The extent of CPAR’s efforts and the wide range of sources needed to develop this product highlight the lack of unified standards and reporting requirements across our educational institutions, as well as the difficulty associated with obtaining comprehensive education finance data.

Based on objective data and estimates, the report shows that in Nebraska spending is over $8.5 billion annually on education systems across all fund sources. Nebraska public education entities serve, collectively, approximately 425,000 students and employ just over 76,000 full-time equivalent staff. The report also illustrates the decentralized nature of Nebraska’s governance structure, which includes 1,959 elected officials system-wide. While the dedication of these officials is unquestioned, the fragmented nature of the state’s governance structure adds difficulty to the fundamental task of aligning efforts and resources toward a common statewide vision, which is essential to maximize the state’s return on its educational investment. The need to draw parties together, across education and business, to identify and implement a common educational vision is critically important and is reinforced throughout Accelerate Nebraska’s research. We hope this report will help stimulate action toward this outcome.

Sincerely,

Jeff Schmid
